

Keep Loudoun Beautiful
By Jordan Weber

I think to keep Loudoun County beautiful is to not throw away any newspapers, old clothes, or small shoes. Bottles may be recycled. Small shoes or old clothes may go to people who might use them. Grocery bags may be reused or recycled. Lakes should have no litter or trash in them including land and everything else. You should never litter always find a near by garbage can. Also plant trees and flowers to keep Loudoun beautiful. Plant some grass. If you ever throw stuff away, people take it to a place called a landfill. After they're finished, they start building houses on top of it. They make millions of landfills and build many more houses. Landfills can kill many trees and flowers and some animals. The trees are very important because they give us oxygen. If you ever been somewhere that is a huge hill, that is a landfill. If you recycle, that won't happen. If you do recycle, it makes it into something new. So that is much better seeing a hill fill of garbage. Make sure you recycle. Make Loudoun Beautiful!
