

Keep Loudoun Beautiful!

We live in Loudoun and we need to keep it beautiful. Wouldn't it be bad if a tourist came and said, "This is the most polluted and dirty place I've ever seen!"? All the plants and animals in Loudoun would die if we keep building things, keep cutting down trees without planting new ones, or polluting. We also shouldn't litter. We need to recycle paper to save trees and plastic to save oil. You know, the average American throws away about four pounds of garbage a day! We really should try to keep Loudoun beautiful so our children and grandchildren can see the beauty of the landscape.
