

2008 KEEP LOUDOUN BEAUTIFUL ESSAY

April 28, 2008

I keep Loudoun beautiful by recycling and picking up litter. Recycling keeps our county beautiful because it reduces the amount of trash and pollution. Recycling also helps us keep the natural resources we use at a limit. For example we don't have to cut down as many trees when we recycle our newspapers, magazines, homework, school work and office paper.

I recycle at home by sorting the paper into one container and the cans, bottles and plastics into another container. When the cans are full we take them to the recycling center at Mickey Gordon Park.

When I went with the cub scouts to pick up litter on a road in town, we were helping to keep Loudoun beautiful. We were able to collect almost ten full trash bags of litter. Then the Cub Scout leaders took it to the recycling center.

There are lots of ways to keep Loudoun beautiful, these are only some of them. If everyone would do something to keep our county beautiful it would be amazing at how nice our county would be to live in.
