

Loudoun County is a beautiful place to live, but we need to work to Keep Loudoun Beautiful. We can do this by recycling, cleaning up, and starting garden clubs.

Families can get blue recycling bins from the county. In them, you can put milk jugs, newspapers, aluminum cans, and lots more. The recycling truck picks up the contents and takes it to a recycling center where it can be used to make other objects. Some objects can be reused up to seven times which really helps the environment.

We can also start cleaning up our local communities. Sometimes Scouts, clubs, or even neighbors will get together and pick up trash, but some people still litter. Trash left around can be harmful to the environment and it doesn't look pretty.

Garden clubs would be a great way for people to get together and plant trees, flowers, and other plants around the county. It would make Loudoun more beautiful and help to replenish the loss of plants and trees due to construction and weathering. This would also help our local wildlife survive.

There are many ways to Keep Loudoun Beautiful. Recycling, cleaning up, and starting garden clubs are three good ways to start. Let's all make an effort to Keep Loudoun Beautiful!
