

Keep Earth Clean !!!!

Earth looks beautiful in space. But Earth's beauty is decreasing every second. This might be surprising, but we are doing this damage. How? We are littering, spilling oil and gasoline, and dumping trash into rivers. I will give you some ideas on keeping Earth clean. A way to clean up litter is invite your friends over to your local park and make signs. You could also go around picking up trash. To stop oil and gas spills take carpools so less gasoline can enter the Earth, set up signs, and tell every gas station about oil and gas spills. People need to be reminded about litter. I want Earth to be the Planet Of Life, not Planet Of Litter. I hope people stop littering soon.
