

# Keep Loudoun Beautiful

There are so many different things people can do to Keep Loudoun Beautiful. You don't have to go all crazy by reusing bath water for cooking or taking out all light bulbs and only use sunlight. Some little things you can do are start a little club that will go green. Go to parks and pick up trash, bottles, bags, and glass for recycling. Could you imagine what life would be like if there was trash covering the ground? It would be hard to walk around without stepping on it, and rivers would be even more polluted than what they are today.

Another thing you can do is plant trees and flowers because there are so many trees getting cut down to manufacture houses, buildings, and paper. Our earth needs trees to help us breathe and get rid of carbon dioxide. Trees and flowers also make places look pretty and nature friendly.

Replacing regular light bulbs with energy saving light bulbs can also help us save earth, just don't drop them or you will have a big problem on the floor. You can also install solar panels to save electricity and help stop Global Warming.
