

Keep Loudoun Beautiful

What can we recycle?

If you recycle one water bottle it will save enough electricity to power a 30 watt bulb for 6 hours. If you recycle a glass bottle it can be used to power a computer for 25 minutes. If you recycle a tin can it can be used to power a TV for 3 hours.

We can recycle Coke and Sprite cans, root beer cans, and a lot more soda cans. You can recycle a lot of glass containers, drink bottles, and baby food jars. We can recycle paper like newspaper and scrap paper. 70% less energy is required to make new paper using recycled paper compared to using raw materials and making it from scratch.

Why should we Clean-up?

We can help clean up by throwing our gum away, and not spitting it out on the ground. Also, we can help by picking up trash on the ground and throwing it in the garbage, even when it is not our trash. Please keep Loudoun beautiful.
